Hiring Manager

NEPCS

House# CEN(A) 4, Road#94, Gulshan-2, Dhaka-1212

Subject: Application for the position of IT Engineer.

Dear Hiring Manager,

I am writing to express my keen interest in the position of **IT Engineer** at **NEPCS**. With a strong academic foundation in Computer Science and Engineering and hands-on experience in both software development and data analytics, I am confident in my ability to contribute effectively to your IT team.

I completed my **B.Sc. (Hons) in CSE** from **BGC Trust University Bangladesh** in 2024. Shortly after graduation, I began my career as a **Software Developer Intern** at **Alchemy Software Ltd.**, where I gained valuable experience in coding, system testing, and development methodologies in a professional software environment.

Following that, I worked full-time as a **Data Artist Associate** at **Catalyst Solution**, where I was responsible for data visualization, analysis, and reporting. This role refined my problem-solving abilities and enhanced my technical skills in managing and interpreting large data sets, skills that are essential for supporting and maintaining IT infrastructure and systems.

My combined experiences have equipped me with a solid understanding of both software systems and data-driven technologies. I am passionate about problem-solving, system optimization, and contributing to robust and efficient IT operations. I am particularly drawn to the innovative work at NEPCS and would be excited to be part of a team that values technical excellence and forward-thinking solutions.

I would greatly appreciate the opportunity to further discuss how I can contribute to your organization. Thank you for considering my application.

Sincerely,

Diprodip Das
